ALLOWANCE

Rejection of claims 3 and 4 under 35 USC 112 2nd paragraph is withdrawn in view of applicants remarks.

Rejection of claims 1-4 under 35 USC 103(a) made over Mirabelli (US 5,037,978; '978) is withdrawn in view of applicants arguments.

Reason for allowance

Claims 1-10 are allowed

The following is an examiner's statement of reasons for allowance:

Closest art is Mirabelli ('978). Mirabelli describes a method of producing methacrylic acid ester via trans-esterification reaction. The methanol produced in the reaction is removed as azeotropic mixture with methyl methacrylate via distillation. The instant invention is directed to a method of producing methacrylic acid ester where the methanol produced in the reaction is removed via distillation. The instant invention differs from that of Mirabelli in that the distillation is performed with controlling the temperature at 3 stages of the distillation column. Applicants have provided a side-by-side comparison of their temperature-controlled method to the method in '978, where there is no attempt to control the temperature and only the temperature of the top segment of the distillation column is recorded. When the two experiments are compared the benefit of the instant invention is clear. By controlling the temperature of the lower middle and top portions of the distillation column the applicants were able to

Application/Control Number: 10/540,924

Art Unit: 1621

significantly reduce the amount of methyl methacrylate lost to the distillation process. In Mirabellis' example (comparative example one in the specification of the instant application, p19-20) the content methyl methacrylate in the distillate was 64.7%. The claimed method reduces that content to 37.2% (see example 1, p16-17), thus reducing the loss of methyl methacrylate. Mirabelli does not control the temperature of the lower and middle parts of the distillation column and fails to realize the benefit of doing so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yevgeny Valenrod whose telephone number is 571-272-9049. The examiner can normally be reached on 8:30am-5:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
